

WORK EXPERIENCE

Qualtrics - Machine Learning Engineer, Intern

May - Aug 2018

- o Achieved ~96% accuracy with a .005% false positive rate, matching state of the art on phishing detection by researching and implementing system using sophisticated NLP feature engineering and machine learning
- o Increased speed of system 3x resulting in a 63% reduction in hardware costs while handling 3 million daily requests by engineering asynchronous API using parallel processing and high performance computing techniques
- o Identified, explored, and implemented state of the art emerging topic tracking system which allowed my team to reach their stretch goals for the quarter
- o The final estimated impact of my internship is \$300k - 500k in yearly savings
- o Utilized: python, parallel processing, scala, javascript, html/css, machine learning, git, docker

Amazon Alexa Prize Team Eve - Machine Learning Researcher

Jan - Apr 2018

- o Designed and built an offensive speech filtering system using probabilistic methods, which performed ~3% better than current industry standards
- o Researched and designed a complex sentiment analysis tool that classified sentences as having complex sentiment used for noteworthy knowledge retrieval
- o Utilized: python, natural language processing, client/server architecture, naive bayes

Perception, Control, and Cognition Lab - Deep Learning Researcher

Dec 2016 - Present

- o Explored relationship between bayesian methods and deep learning
- o Researched attribution techniques for black box machine learning
- o Delved into differential geometry to improve machine learning generalization
- o Develop system to improve MRI quality by utilizing deep manifold learning
- o Designed deep architecture to improve hearing aid quality resulting in signal to noise ratio increase of 197%

Private Capital Group - Software Engineer, Intern

May - Oct 2016

- o Developed web solutions to significantly increase employee effectiveness by creating automated systems that resulted in yearly savings of over \$200,000
- o Collected, cleaned, and analyzed internal and external data which was built into reporting dashboards that tracked key business insights and allowed partners to make informed decisions
- o Decreased product downtime by 47% by implemented full testing suite and fixing critical bugs
- o Utilized: python, javascript, html/css, git, SQL

Carnegie Mellon University - IT Lab Research Fellow

June - Aug 2015

- o Excelled in machine learning course work as a top 3 student in the cohort, achieving a 4.0
- o Analyzed data and developed a custom web game to help local refugees learn English
- o Utilized: python, c++, javascript

OTHER EXPERIENCE

Start up acquisition: Founded Legal Leaf and lead a team of 3 while building product. Experienced 10x growth in 8 months which resulted in our acquisition. Product awarded *most innovative* and *best use of AI* from GLH Utah

Communication: Selected by faculty and staff to represent my college's 4,000+ students by presenting my research to BYU's \$1 million+ donors and top administration.

1st place BYU ACM Hackathon 2016: Created *Mathify* app using polynomial interpolation to display text as math

1st place BYU ACM Hackathon 2017: Created Auto Dino program to perfectly play the chrome dino no wifi game

2nd place BI Wolff Hackathon: Built prescriptive ML solution to predict individual risk of becoming homeless

Computer Vision/Control Theory: Developed computer vision curriculum for a control theory class and built an autonomous following car

EDUCATION

M.S. Computer Science; 4.0

Brigham Young University

Apr 2020

Provo, UT

B.S. Applied and Computational Mathematics; 3.81

Brigham Young University

Apr 2018

Provo, UT
